My Search for the Perfect Resin

by Laurie K. Brown – L'Art Theory

I searched for the perfect resin,
I researched products priced high & priced low.
I got confused and thought...this is just too hard,
I don't know which route to go....

I wanted to find a product with a great shine,
A product that had been around and passed the
test of time.

It had to be tough, non-yellowing, & easy to use,
You know... a product with great reviews.

I needed to find a product that worked well with
my imagination,
And product that would stand up to my
expectations.

That's when I found Pro Marine!
It's the best I've ever seen!

As an Artist, I use the resin to make my art pop!
People like it so much; they want me to teach
with it in a workshop.

It works on canvas, ceramic and wood.
I would use on Pro Marine Resin on
EVERYTHING if I could!

Pro Marine

Making tumblers by day
Letting it cool by night
Putting them up for display
Making sure they're just right

As orders come in
My resin goes down
I look in my bin
Luckily, there's more to be found

Glitter goes everywhere
As I decorate my cups
I sit and I stare
Making sure there's no hiccups

My tumblers are almost done
They look so serene
This was so much fun
All thanks to, using ProMarine

~ Hoa Lam, Designs by Flower

Ode to Our Table

Our table is precious, a true gift of art
"Twas born in the 70's, new life got its start.
A man was commissioned to bury the shells
Seal them with epoxy resin, their life's story tells.

Through these years the kids ate round this old
wooden spool
Sharing stories of our lives, which was so very
cool.
Buried forty-five years in this resin so well
Surviving life's most loved passions, no secrets
they tell.

Alas, our table weathered hard use through the
years
Time to give it a face lift, we said it appears.
Can we do it ourselves? With hard work, yes, we
can!
So, we sanded and scraped resin layers off, and
then...

Carefully poured epoxy resin with much love and to
seal
All those old happy shells once again we'd
conceal.
For generations to come our grandchildren will
gather
Sharing life's new adventures and stories that
matter.

'Round this beautiful table with more life to
preserve it
Our shells with new resin encasing them deserve
it!

May Poetry Contest Winners - Epoxy Prose

May: Epoxy Prose

There once was a virus name corona, that at first, we thought was a bunch of bologna. Then people started to get sick and die and we all had to learn to stay inside.

What were we to do, just all sit around and be blue?
Heck no we said, our creativity needs to be fed!
So, we grabbed some molds, epoxy too
and started to create things in every hue!

Tables, keychains and coasters galore, using micas, glitters and inks as fast as they arrived at our door!

Artists are corny and a tad weird,
but so is this virus that we all fear!

Being able to pour, mix and make fun pieces,
definitely helps and my anxiety decreases.

So, everyone keep using your pro marine
and all your projects will have the shiniest pieces
you've ever seen!

~ Karen Yocks :o)
